

## DETERMINING CORRECT CIS POWER BOARD FOR GRAPHTEC 42" SCANNERS

The CIS Power Board for the Graphtec 42" scanners comes in two versions: The A version and the non-A version.

### Identifying the board by scanner:

Look at the right end of the scanner where the USB connection is. In the non-A version of the scanner, the USB connection is on the bottom of the two connections. On the A-version of the scanner, the USB connection is on the top of the two connections.

### Part# 28GR794050004: CIS Power Board, A version

This is the later version of the CIS Power Board and is for the IS200-A, IS210, CS500-A, CS510, CS600-A and CS610 scanners. It has an extra connection compared to the earlier version.

### Part# 28GR774016502: CIS Power Board, non-A version

This is the earlier version of the CIS Power Board and is for the IS200, CS500 and CS600 scanners. It is missing a connector compared to the later version.
